The corner stone of the Methodist Episcopal church was laid yesterday.

Notwithstanding the fact that it rained incessantly during the entire day a large congregation gathered in the old church where the services took place under the direction of Presiding Elder Thorpe. The following ministers took part in the services: Revs. W. L. Thorpe, Richard Horne, W. E. Gar, John Dary, W. J. Guss, and the pastor, F. P. Doty. In the absence of Rev. J. G. Eckman and Dr. Pearce, who were to have made the addresses, Rev. John Dary and Presiding Elder Thorpe very ably filled their places. The choir rendered some choice anthems which were listened to with delight.

The ceremonies were conducted in the manner directed by the discipline of the Methodist Episcopal church, when the congregation gathered around the spot where the stone was ready to be put in place. The stone laid is the same which our fathers laid for the old old church twenty-six years ago. Then it was laid just as it came from the quarry; now it is left and beautified by its two fold purpose as corner stone and memorial stone. The history of the Methodist Episcopal church in Peckville is as old as the town itself.

From her pulpit the truths of scripture have fallen upon the ears of children who are now aged men and women, and who live in grace and with life examples. The edifice will be completed at an early day and will give much needed convenience to the congregation.

Father Donlan and singing by St. Mary's choir, the participants will disperse.

### AVOCA.

Between 3 and 4 o'clock yesterday morning the abandoned reservoir of the Pennsylvania Coal company, taxed by the recent heavy rains, burst its banks on the east side and the huge volume of water for a time gave the appearance of a second Johnstown flood. The reservoir is situated on the hill and the velocity of the water, as it rushed down Plum street, carried everything portable before it. The water in its mad rush tore up the streets and flooded the Langcliff Coal company's tunnel, and the shaft of the Avoca Coal company, known as the "Last Chance." It is impossible to investigate the damage to the workings of the mines, but it is thought it will take several days to clear away the debris so that work can be resumed. The reservoir is quite large, being about 1,800,000 feet, and from 8 to 12 feet deep. It was constructed by the Pennsylvania Coal company to supply the boilers at No. 3 plane and vicinity, but since the gravity road was abandoned the company has not used it. The Hillside Coal company of late years has used it to supply the boilers at its works. The flood caused much excitement for a time and not until it was learned that no human lives had been sacrificed did the residents feel relieved.
